***Q2 Machine Learning***

| Algorithm             | Accuracy (correctly classified instances) | Time to build model (seconds) | Readability  |
|-----------------------|---|-------------------------------|--|
| NaiveBayes            | 92.9722 %                                 | 0                             | Has data table, very clear to read   |
| Multilayer Perceptron | 93.4114 %                                 | 20.95                         | Has clear branches with name and statistics but there's too much data and a bit hard to read |
| JRip                  | 92.2401 %                                 | 0.17                          | Hard to read with all the data putting together in a whole section                           |
| J48                   | 91.5081 %                                 | 0.08                          | Has tree structure, easy to read   |
